

Wonderful Snack

By: Abby Lawall

Today in class we made amazing Rice Krispie treats. Making Rice Krispie treats is so easy to make. We made them to not only enjoy a great snack, but to review some measurement skills. If you follow these directions you too can make this wonderful snack! First we gathered all our supplies. We needed $\frac{1}{4}$ cup butter, 10 $\frac{1}{2}$ ounces marshmallows, 6 cups Rice Krispie, heat source, pot, 9 by 12 cake pan, spone and cooking spray. Now we are ready to start.

First we turn on the heat source to medium. Next we put $\frac{1}{4}$ cup butter and 10 $\frac{1}{2}$ ounces marshmallows into the pan. We then stirred this for approximately 5 minutes until the butter and marshmallows were melted. We then remove the pot from the heat. After that we added 6 cups of Rice Krispie to the pot. We stirred this sticky combination until the cereal and the melted marshmallows were completely mixed. Then we poured the Rice Krispie snack into a 9 by 12 pan that was sprayed with oil. (This pan has an area of 108 in. sq.) We spread out the snack with some wax paper that had been sprayed. We let the snack cool before we cut it. We then we got to eat it. I think the snack was outstanding. I also think it was sticky.

Making Rice Krispie treats is fun. You just need to remember the supplies. If you do this you too can have an amazing snack. We never made this at home but I hope we do.
