

CHANGING HISTORY

Keira Pringle & Baylee Hackenberg

Traveling Back in Time

In order to go back in time we are going to see our cousin (the evil scientists). When we arrived she told us she had the perfect thing, a horse. One day she was making different medicines for horses and accidentally messed up. She had made a medicine that sent the horse back in time every time it was injected with it.

Killing Louis Armstrong

- Louis Armstrong was famous for creating scat.

Our plan:

- Show up at one of his performances
- Sneak poison into his drink or food.

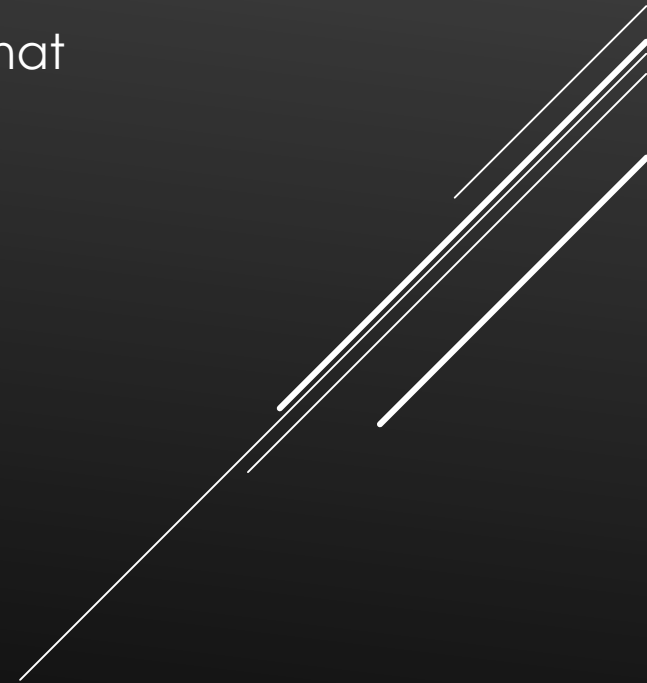

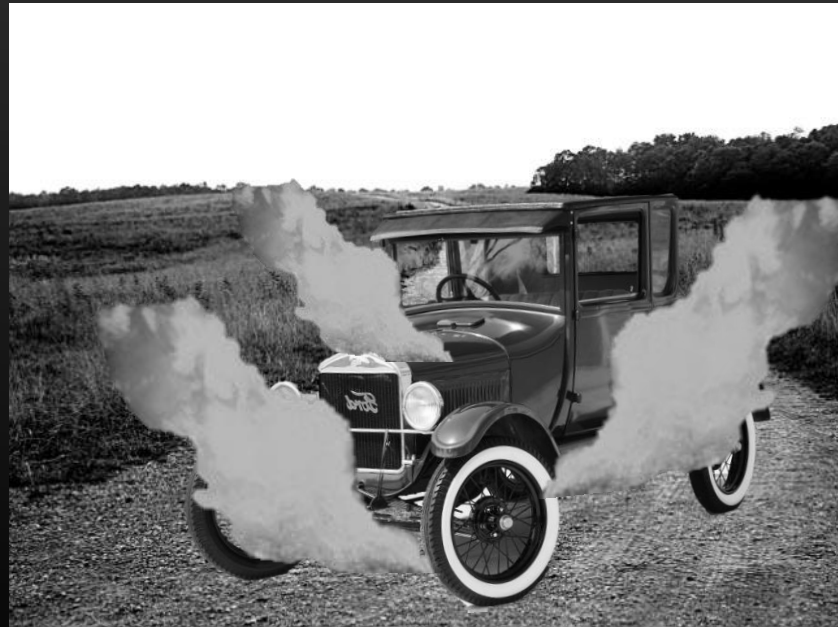

Destroying the Model T

- The Model T was one of the first cars to be sold for very little money.

Our Plan:

- Sneak into Henry Fords factory
- Hide until everyone leaves
- Once Everyone leaves we are going to take the Model T far away from the factory. Once we do that we are going to burn it.

Stopping The Jazz Singer

- The Jazz singer was the first movie where the sound matched the action.

Our Plan:

- Go to the set in California
- Blow it up with everyone in it

Our Repercussions

Killing Louis Armstrong:

- Music wouldn't be as popular

Destroying the Model T

- Cars wouldn't be as popular and they would be less affordable.

Stopping The Jazz Singer

- We wouldn't have movies with voice overs.
