CPU=is the abbreviation for central processing unit. Sometimes referred to simply as the central processor, but more commonly called processor, the CPU is the brains of the computer where most calculations take place.

RAM=is an acronym for random access memory, a type of computer memory that can be accessed randomly; that is, any byte of memory can be accessed without touching the preceding bytes. RAM is found in servers, PCs, tablets, smartphones and other devices, such as printers.

CD-ROM=a compact disc used as a read-only optical memory device for a computer system.

Display=an electronic device for the visual presentation of data.

Modem=a combined device for modulation and demodulation, for example, between the digital data of a computer and the analog signal of a telephone line.

Hard drive= a high capacity, self-contained storage device containing a read-write mechanism plus one or more hard disks, inside a sealed unit. Also called *hard disk drive*.
